a Nominal factors
Paper reproduction
Numerical updates
$C_{ISR} = 1/(1+\delta)$
$\sqrt{s}$ [GeV]
b Same-definition factor comparison
Updated / reproduction − 1 (%)
$\sqrt{s}$ [GeV]
c Propagated input uncertainties
Paper reproduction
Numerical updates
Factor standard deviation
$\sqrt{s}$ [GeV]
d Absolute uncertainty difference
Updated SD − reproduction SD
$\sqrt{s}$ [GeV]
